Press release

mm-lab is TISAX certified!

Kornwestheim, August 14, 2025. As a system provider of telematics solutions for the automotive industry and municipal fleets, information security is not just a buzzword for us, but something we put into practice every day. Since 2017, we have been regularly audited to ISO 27001 with great success.

Now we have added TISAX certification, which is relevant in the automotive industry! TISAX stands for Trusted Information Security Assessment Exchange and is based on the international ISO 27001 standard for information security management systems.

We achieved the audit objectives "Confidential" and "Data Protection according to EU-GDPR Art. 28" right away and without any deviations. This demonstrates to our customers that we take their data security requirements in our telematics solutions very seriously.

Many thanks to everyone who contributed to this success, especially our information security officer Knud Fromm.
